

Air Compressor Oils

6260 MONOLEC® Centrifugal Compressor Oil A high quality compressor oil designed specifically for use in centrifugal air compressors. Formulated with select paraffinic base stock synergistically blended with additives.

- Excellent corrosion protection
- Superior thermal stability
- Good water separation
- Anti-foaming
- Oxidation resistance
- Designed especially to meet the lubrication oil requirements of Ingersoll-Rand Centac centrifugal compressors
- Contains MONOLEC®, LE's exclusive wear-reducing additive

Technical Information 6401-6407 MONOLEC® R & O Compressor / Turbine Oil Long life, versatile, rust and oxidation inhibited, anti-wear premium grade industrial oil for use in all types of air compressors and oil circulating systems.

- For reciprocating compressors, rotary screw and vane compressors, blowers, and vacuum units
- Non-foaming
- Combats high temperatures, water contaminants and heavy loads which accelerate wear
- Provides much longer equipment and oil life
- Performance enhanced by an oxidation inhibitor which protects much better than ordinary commercial and most synthetic compressor oils
- Reduced power usage (energy cost savings)
- Reduced wear
- Lower operating temperatures
- Minimized carbon, varnish, and sludge formation
- Excellent water separation and rust control
- Excellent compatibility
- Versatile
- Contains MONOLEC®, LE's exclusive wear-reducing additive

Technical Information

Product Information 6801-6807 MULTILEC® Industrial Oil A truly multi-functional industrial oil to meet the requirements of air compressors, hydraulics, industrial turbines, R&O and anti-wear industrial and gear applications.

- One product that meets OEM requirements for use as an anti-wear hydraulic oil (without zinc), air compressor oil, R & O inhibited turbine oil, AGMA R & O gear oil, and/or circulating oil systems
- Multi-functional
- Heavy-duty
- Combats acid hydrolysis in rotary screw compressors
- Excellent water separation ability
- Exceptional energy savings
- Contains MONOLEC®, LE's exclusive wear-reducing additive

Technical Information

Product Information 9032-9150 MONOLEC® Synthetic Industrial Oil Extends oil drain intervals, reduces wear and oil consumption, and practically eliminates deposits and sludge formation designed for elevated temperature use.

- 100% synthetic Poly Alpha Olefin (PAO)
- Extended oil drain intervals
- Reduced wear and oil consumption
- Eliminates deposits and sludge formation in equipment operating at extreme temperatures
- Outstanding thermal and oxidation stability
- Cooler, cleaner operation
- Improved equipment efficiency and reduced energy consumption
- Excellent compatibility with seals
- Contains MONOLEC®, LE's exclusive wear-reducing additive
