

Turbine Oils

4941-4946 All Purpose Turbine Oil A rust and oxidation turbine oil designed with additives that offer excellent rust protection and exceptional oxidation stability.

- Rust and oxidation inhibited
- Made from high quality paraffinic base oil
- Excellent water separation

Technical Information 6401-6407 MONOLEC® R & O Compressor / Turbine Oils Long life, versatile, rust and oxidation inhibited, anti-wear premium grade industrial oil for use in all types of air compressors and oil circulating systems.

- For reciprocating compressors, rotary screw and van compressors, blowers, and vacuum units
- Non-foaming
- Combats high temperatures, water contaminants and heavy loads which accelerate wear
- Provides much longer equipment and oil life
- Performance enhanced by an oxidation inhibitor which protects much better than ordinary commercial and most synthetic compressor oils
- Reduced power usage (energy cost savings)
- Reduced wear
- Lower operating temperatures
- Minimized carbon, varnish, and sludge formation
- Excellent water separation and rust control
- Excellent compatibility
- Versatile
- Contains MONOLEC®, LE's exclusive wear-reducing additive

Technical Information

Product Information 6451 MONOLEC® Turbine Oil A premium quality rust and oxidation and anti-wear oil designed specifically to meet the performance specifications of mainline turbine manufacturers.

- Rust and oxidation inhibited
- Excellent water separation
- Non-foaming
- Long service life
- High film strength to protect moving parts
- Contains MONOLEC®, LE's exclusive wear-reducing additive
