

## Dry Film

9200 ALMASOL® Dry Film Lubricant Combines superior dry film lubrication with safe, conventional application for use in a temperature range of -100°F to 650°F (-73°C to 343°C). Packaged in convenient aerosol container that contains no fluorocarbons and is environmentally friendly.

- Reduces wear and friction
- Excellent EP properties
- Provides long lasting lubrication
- Economical
- Cures in 2-4 hours at room temperature
- Versatile
- Offers 2-5 times longer wear life than competitive dry film lubricants
- Aerosol spray for use where permanent lubrication with exceptional long wear life and low frictional properties is desired and oil and grease cannot be used
- Contains ALMASOL®, LE's exclusive wear-reducing additive
