

Wire Rope

2001 MONOLEC® Wire Rope Lubricant A highly penetrating fluid lubricant with excellent load carrying capacity. Designed to penetrate to and through the core of wire ropes either standing or running.

- Provides superior load carrying capacity and corrosion resistance
- Contains petroleum solvent to enhance penetration to the core
- Increased wire rope life
- Superior lubrication
- Preserves metal
- Self cleaning
- Excellent rust preventative
- Contains MONOLEC®, LE's exclusive wear-reducing additive

Technical Information

Product Information

2002 ALMASOL® Wire Rope Lubricant A fluid coating wire rope lubricant that provides a self healing film to reduce wear and corrosion under extreme load and moisture. It penetrates into the core of running wire ropes to provide protection against fretting corrosion, wear and rust.

- Coating lubricant that provides a self-healing film
- Reduces wear and fretting corrosion
- Resistant to fresh and salt water wash off
- Excellent rust preventative for steel parts
- Non-tacky coating resists abrasive contaminants
- Protects sheaves, drums, pins, and rollers from excessive wear
- High load capacity
- Superior lubrication performance
- Resists corrosion
- Contains ALMASOL®, LE's exclusive wear-reducing additive
