

Did you know?... Lubrication Engineers is 'The Lubrication Reliability Source'?

FORT WORTH, Texas, USA -June 5, 2006 – Since 1951 Lubrication Engineers (LE) Inc has been known & respected in the lubricants industry for its premium range of Enhanced Lubricants®. LE lubricants increase profitability for customers through longer equipment life, extended service intervals, energy reductions, fewer repairs and improved reliability (less expensive downtime!) Lubrication Engineers has decided to build on this reputation for improving reliability by trade marking ‘The Lubrication Reliability Source’; marketing strap line and negotiating a series of exciting associations with several other leading companies involved in the ‘Reliability’ field.

LE Lubrication Consultants worldwide are now able to offer their LE customers not only the best lubricants available, but also a range of other quality reliability improving products such as storage & handling systems, oil sight glasses and lubrication equipment.

LE Inc is proud to announce the new reliability products that its Lubrication Consultants are now able to offer to customers worldwide:

- Noria Corporation – Consulting & Education Services – on-site, public & web-based training courses, consulting services and Lubrication Programme Design (LPD)
- Oil Safe® Lubrication System – Lubricant handling systems of dispensing containers that make machinery lubrication easier, faster & cleaner
- Liquidynamics – Manufacturer of a wide range of oil & lubrication equipment.
- Esco Oil Sight Glasses – Clear oil sight glass makes it easier to observe oil contamination.
- Y2K Fluid Power Inc – Manufactures oil filtration products – ‘world class oil handling’.
- IFH Group – manufacturer of fluid storage & dispensing equipment & fluid transportation equipment.
- Tote-A-Lube – Patented stackable poly tanks for the storage & dispensing of class IIIB fluids & chemicals

LE Inc already offers its own series of Reliability programmes to LE customers worldwide, that include:

• LE Enhanced Lubricants:

LE’s mineral & synthetic lubricants are engineered to achieve optimum performance in a specific range of applications without limitations on the base oil type or additives used.

• Lubrication Engineers Analysis Programme (LEAP):

This programme enables customers to monitor the condition of their lubricants & equipment through a progressive oil analysis.

• ZAP! Energy Saving Programme:

LE Lubricant consultants work with their customers to identify where in their businesses it is possible to save energy & maintenance costs by using LE lubricants. LE products enable businesses to ZAP! their electrical energy costs.

‘LE is committed to increasing its customers’ equipment reliability and resulting profitability’, said Randy Kressler, President, Lubrication Engineers Inc.

Lubrication Engineers Inc, USA has been a leader in lubricants since 1951. LE manufactures and markets a comprehensive line of heavy-duty, premium quality lubricants formulated from the highest quality 100% select paraffinic base stocks. These lubricants are manufactured under an ISO9001 certified quality system at a state of the art plant in Wichita, Kansas, USA. LE’s objective: increase your profitability. LE products are designed to increase profitability through: longer equipment life, extended service intervals (reduced lubricant consumption), energy reductions, reliability (less downtime), fewer repairs (fewer parts & less labour) as well as less inventory (multi-purpose products) LE products are available worldwide (outside USA, Canada & Mexico) through LE International AG’s network of over 50 distributors.
